⭐ OBJECTIVE

I am a motivated Computer Science graduate with a strong foundation in technology and hands-on experience from academic projects and internships. I'm looking for an opportunity to grow in a collaborative environment where I can apply my skills, learn from industry professionals, and contribute meaningfully to the team's success.

🎓 EDUCATION

Bachelor of Science in Computer Science   May 2025
Asian College of Technology IEF - Main Campus   Pantaleon del Rosario St, Cebu City, 6000 Cebu
- Cum Laude
- Dean's Lister
- Best Research Thesis Awardee

💼 EXPERIENCE

Entry-Level Data Analyst   March 2024 - Present
OfficePartners360 - Cebu Branch   Cebu IT Park, 7F & 9F Ebloc 2 Tower, W Geonzon St, Apas, Cebu City, Cebu
- Extract and review data from spreadsheets to verify supplier activity and product availability using internal tools.
- Generate customized workbooks containing specified SKUs for client management and data entry.
- Consolidate completed workbooks from various sources to ensure accuracy and completeness.
- Upload and organize final data sets to the system for client access and review.
- Ensure timely and accurate delivery of product data files in accordance with client specifications.
- Collaborate with team members and follow standard operating procedures for data processing and quality assurance.

OJT/Internship   February 2025 - June 2025
RAFI Microfinance   3rd Floor City Savings Bank Financial Plaza Osmeña Blvd. Corner P. Burgos St. Senyor Santo Niño, Cebu City

During our internship, my team was assigned to enhance an existing internal system called One App, which functions as a master platform for managing various company services. Our task was to develop a new feature that controls user accessibility across different services. Specifically, we built the Roles and Access and Service Accessibility modules. I was primarily responsible for the Roles and Access feature, where users' access to specific functionalities can be enabled or disabled based on their assigned roles. In collaboration with my partner, we designed the UI mockups in Figma, developed the business logic, and implemented the database structure. We used modern technologies such as T3 Stack, Next.js, Tailwind CSS, Prisma, and shadCN UI to bring the feature to life. The feature successfully improved access control within the system and contributed to the platform's scalability.

⬡ Skills

Tools and Languages:	HTML, CSS, JavaScript, C#, ASP.NET, Flutter, Xamarin, .NET MAUI, Unity, MS Office
Frameworks & Libraries:	T3 Stack, Next.js, Prisma, Tailwind CSS, Bootstrap, Shadcn, Blazor
Design & Collaboration:	Figma, Canva, Visual Studio, VS Code, Git, GitHub, GitLab, Agile, Scrum
